Prevalent Software, Inc. Introduces Quillix

Quillix is a Revolutionary New, Browser Based, Distributed Capture Solution For The Internet

January 18, 2000
Colorado Springs, Colorado

Prevalent Software, Incorporated® a leading provider of eCommerce automation software, today announced the introduction of their newest product, Quillix. The announcement was made today at the Optika® International Summit where Prevalent is a sponsor.

Quillix is the first true enterprise, distributed capture system built for the Internet. It is designed to provide a low-cost capture solution using TWAIN compliant desktop scanners and XML based Internet forms and runs totally within the Web browser. Whether an organization has one or a thousand remote offices, if they depend upon information collected at these locations, Quillix makes capturing and utilizing this information as easy as browsing the web. Off site insurance agents, for example, can scan claim forms and transmit that information

Prevalent Software, Inc. Introduces Quillix

Quillix is a Revolutionary New, Browser Based, Distributed Capture Solution For The Internet

January 18, 2000

Colorado Springs, Colorado

Prevalent Software, Incorporated® a leading provider of eCommerce automation software, today announced the introduction of their newest product, Quillix. The announcement was made today at the Optika® International Summit where Prevalent is a sponsor.

Quillix is the first true enterprise, distributed capture system built for the Internet. It is designed to provide a low-cost capture solution using TWAIN compliant desktop scanners and XML based Internet forms and runs totally within the Web browser. Whether an organization has one or a thousand remote offices, if they depend upon information collected at these locations, Quillix makes capturing and utilizing this information as easy as browsing the web. Off site insurance agents, for example, can scan claim forms and transmit that information to the main office, instantly, over the web.

Prevalent designed Quillix with the assistance of Integrated Document Technologies Inc. (IDT) a Prevalent development partner. Because of their experience in delivering eCommerce Solutions, IDT was instrumental in the design of Quillix. "Prevalent brings a suite of products to the market that are innovative in the automation of eCommerce Business Processes and invaluable to our customers," said Paul Szemplinski, President of Integrated Document Technologies, Inc. "The promise of workflow automation and the vision of integrated eCommerce have become a reality for our customers thanks to our relationship with Prevalent. In keeping with their vision Prevalent has developed a revolutionary document and data capture product for the eCommerce industry."

In addition to the innovative browser interface, Quillix also includes a robust and open Web Server component to release scanned documents and information to a wide variety of eCommerce, workflow, document imaging and data capture systems. There is no longer a need for disparate scanning and indexing applications for each document and data management system within an organization. With Quillix just log-on, scan and release the information to the appropriate document or data management system. Because the Quillix Web Server is built on an extensible architecture, release components can easily be built for other systems. Quillix can turn your eCommerce application into a complete eCommerce Web solution.

"The Web has made distributed computing possible," said Robert Latham, President of Prevalent Software. "Quillix now makes it practical."

About Prevalent Software

Prevalent Software, Inc. is based in Colorado Springs, CO and is a developer of world-class eCommerce software. Founded in 1998 by veterans in the development of workflow and document imaging software, Prevalent has developed a suite of products that maximize the investment in office automation systems. Prevalent is committed to building software products that provide organizations the ability to embrace eCommerce and Internet

technology by leveraging their existing software investment and enabling the integration and automation of existing systems. To find out more about Prevalent's products and services, visit their web site at <http://www.prevasoft.com>.

About IDT

Integrated Document Technologies, Inc. is a leading provider of high performance, client/server, integrated document management and eCommerce solutions. Founded in 1992, IDT focuses on delivering project management, consulting, technical support and application training to a wide range of paper intensive industries. Information about IDT and their products and services can be found on the World Wide Web at <http://www.idt-inc.com>.

About Optika

As an enterprise Internet and software solution provider, Optika® Inc., Colorado Springs, CO. (Nasdaq: OPTK) takes a unique approach to e-business by offering solutions which unite existing business practices with e-business (e2e). Optika eMedia™, the company's flagship Web-based product, handles for the first time both paper-based and e-business transactions within a single solution.

Held annually since 1991, The Optika International Summit is established as an industry tradition providing Optika customers, partners and prospects a forum for learning, collaborating, networking and more. For more information about Optika or Optika eMedia, contact the company at 719.548.9800 or visit www.optika.com.

Prevalent is an Optika Development Partner.

Quillix is scheduled for release in April of this year.
